WDU TRUST TOKEN (WDU)

Scope Declaration

Educational & Transparency-Focused BEP-20 Reference Project

Project Scope

WDU Trust Token exists solely as a clean, observable reference implementation of a fixed-supply BEP-20 token on the public BNB Smart Chain mainnet. The design intentionally excludes all non-essential features so that observers can study pure BEP-20 behavior in a live mainnet environment.

What Is Included

- Standard BEP-20 interface (transfer, approve, allowance, balanceOf, totalSupply, etc.)
- Permanently fixed total supply of 700,000,000,000,000 WDU
- Full source-code verification on BscScan
- Transparent on-chain distribution via ordinary transfers
- Public documentation and multilingual project page

What Is Explicitly Excluded

- No ICO, presale, public sale, or private sale
- No fundraising or investment claims
- No liquidity pool or exchange listing managed by the project
- No mint, burn, tax, fee, reflection, or pause mechanisms
- No upgradeable proxy or administrative backdoors
- No corporate entity, legal structure, or investor relations

Intended Audience

Developers, researchers, students, and technical users who wish to observe and interact with a minimal, immutable BEP-20 contract under real mainnet conditions.

Disclaimer

Nothing in this project constitutes financial, investment, or legal advice. All on-chain activity is public and irreversible. Users interact at their own risk.
